5

次の(a)~(c)の英文を読み、下線部を日本語に直しなさい。

(a) Have you ever seen a greenhouse? Most greenhouses look like a small glass house. Greenhouses are used to grow plants, especially in the winter. Greenhouses work by trapping heat from the sun. The glass panels of the greenhouse let in light but keep heat from escaping. This causes the greenhouse to heat up, much like the inside of a car parked in sunlight, and keeps the plants warm enough to live in winter.

(b) Many researchers believe that the purpose of laughter is related to making and strengthening human connections. “Laughter occurs when people are comfortable with one another, when they feel open and free. And the more laughter there is, the more bonding occurs within the group.” says the cultural researcher Mahadev Apte.

(c) Most of us can't live without the personal computer. Teenagers nowadays spend as much time playing computer games as they do listening to music or playing sports. The mathematical basis of *computing dates back over two hundred years, but it was not until the discoveries of the 20th century that the technology for these advanced machines became possible.

* computing : コンピュータ研究
